## RESEARCHERS ARE MEASURING HUMAN FLOURISHING IN 6 AREAS

## KEY FINDINGS FROM WAVE 1

Middle-income countries (e.g. Indonesia, Mexico, Philippines) often report higher meaning & relationship scores than many wealthier nations

Younger generations (age 18–24) tend to report lower flourishing than older cohorts

Religious participation, even in secular contexts, shows a strong positive association with flourishing

## THE GLOBAL FLOURISHING STUDY RESULTS FROM A COLLABORATION BETWEEN:
